## CUT CODE: FLAP

## PROCESSING PROCEDURES

## Breaking

NA
Procedure
A. Pull the flap meat from the loin (beginning at the end closest to the head of the tenderloin) keeping the underlying yellow tissue on the flap meat, which will prevent hook tears when removing the flap meat.
B. Strip the membrane covering the flap meat from top and bottom surfaces.

## PRODUCT: C4537AH - Boneless Beef Bottom Sirloin Butt Flap Meat

C. Trim the thin edge of the flap meat as specified.
D. Trim the fat to specification.
E. Remove the connective tissue as specified.
F. Remove any scores greater than specification.
G. Remove all blue tissue from the flap meat when producing 30851.

## FINISHED PRODUCT

## Finished Product Trimming

A. The flap will be trimmed to have only flake fat remaining on the top surface. The bottom surface will have the continuous layer of fat removed along the thin edge. Any other fat on the bottom surface will be trimmed to less than 0.1 inch thick and will not be a continuous layer.
B. Trim the thin edge of the flap meat to the lean (salt and pepper exposure).
C. The minimum size will be $6 \times 3$ inch width $\times 3 / 4$ inch thick with feathered edges at $1 / 4$ inch. Pieces which are less than this measurement will be sent to $90 \%$ trim.
D. The connective tissue between the flap meat and the tri-tip will be removed.
$E$. Scores will not exceed 3 inches long $x 1 / 2$ inch deep.
F. Any ragged edges will be trimmed to within $1 / 3$ inch of the flap meat.
G. Loin tail will be removed.
H. The full piece of flap meat will not be cut in half across its width.
I. No partial pieces can go into export small box products.
J. All bone dust will be removed.
$K$. All ink stains will be removed.
L. All bone and cartilage will be removed.
